PROFILE

I help businesses make sense of their numbers. I take messy records and spreadsheets, check that they are correct, and turn them into clear reports and visual dashboards that show what is working, what is not, and where money or time is being lost.

I hold a degree in Finance, have checked financial records for the Kenya Revenue Authority, and have led a 15-person data team for a government ministry. I am looking for a Data Analyst, Finance Analyst or Business Reporting role in Kenya or remote.

KEY RESULTS

- **99% accuracy** kept on records while leading a team of 15+ people.
- **20% faster** record checking after I redesigned how the work was done.
- **25% more work done** by the team after I simplified steps and trained staff.

WHAT I CAN DO FOR YOUR BUSINESS

- **Build dashboards:** one-screen visual reports that show sales, costs, customers or loan repayments at a glance and update automatically (Power BI)
- **Find answers in large databases:** pull together information stored in many places to answer business questions quickly (SQL)
- **Clean and check data:** catch errors, duplicates and missing information before anyone relies on the numbers (Python, Excel)
- **Create spreadsheet reports and trackers:** easy-to-use Excel tools that teams can update without special training (Microsoft Excel)
- **Understand the money side:** business performance, lending and repayments, audit and compliance (BCom Finance)
- **Explain results simply:** turn findings into plain-language recommendations for owners and managers

Tools: Power BI, SQL (MySQL, PostgreSQL), Python, Microsoft Excel, Git and GitHub. Familiar with Google BigQuery and Snowflake.

WORK EXPERIENCE

Data Analyst (Self-Employed)

Dec 2024 – Present

Remote, working with small-business clients

- Help small businesses replace scattered spreadsheets with simple reports and dashboards they use to make decisions.
- Find where clients are losing time or money, and set up tracking so they can see whether things improve.
- Handle each project from start to finish: gathering the data, cleaning it, building the report and walking the owner through it.
- Agree with each client which numbers matter most to their business, then build reporting around them.

Data Entry Supervisor

Oct 2024 – Nov 2024

Ministry of Labour and Social Protection, Kenya

- Led a team of 15+ staff and kept records 99% accurate through daily quality checks.
- Changed how records were checked, cutting checking time by 20%.
- Simplified the team's steps and trained staff, raising output by 25%.
- Prepared regular progress and accuracy reports for management.

Freelance Writer, Finance and Technology

2021 – Present

Fiverr and direct clients, remote

- Research and write clear articles and reports on finance and technology, making complex topics easy for everyday readers.
- Manage several clients and deadlines independently, from research to final delivery.

Trainee

May 2021 – Jul 2021

Kenya Revenue Authority (KRA), Nanyuki

- Helped auditors confirm that financial records were correct and complete by comparing them across different sources.
- Assisted in preparing reports used to support audit decisions.

PROJECTS (full details at sharonnyaga.github.io)

Fintech Business and Loan Review, Kenya Power BI, SQL, Python

Reviewed a digital money and lending business: how fast its customers were growing, how they used the service, how its agents performed and how well loans were being repaid. Built a dashboard and gave recommendations on growth and risk.

Sales Performance Dashboard Power BI

A one-screen view of a shop's sales, customers, products and payment methods, so the owner can quickly spot the best and worst performers.

Retail Sales Study Python

Checked a shop's sales records for errors, then found buying patterns and presented them in simple charts for non-technical readers.

Sales Records Analysis SQL

Combined customer, order and sales records kept in separate tables to answer everyday business questions.

EDUCATION AND CERTIFICATION

Bachelor of Commerce, Finance

2021

Dedan Kimathi University of Technology

Microsoft Certified: Power BI Data Analyst (PL-300)

In progress

Microsoft
