Sharon Viona Nyaga

Data Analyst | Finance Analyst | Power BI, SQL, Python, Excel

Kenya, open to remote and on-site | +254 768 497 873 | vionasharon6@gmail.com
Portfolio: sharonnyaga.github.io | LinkedIn: linkedin.com/in/sharonviona | GitHub: github.com/SharonNyaga

Profile

Finance-trained Data Analyst who turns raw business data into clear reports and recommendations for credit, lending and payments decisions. Background in audit at the Kenya Revenue Authority and data-quality leadership in government, so I check where every number comes from before I report it, and I write for the person who has to act on it.

Selected Projects

Harbourline Finance: Credit Risk and Loan Approval Strategy — Python, SQL, Power BI

Link: github.com/SharonNyaga/harbourline-credit-risk-analytics

- Built a borrower risk score from 11,582 past loans that ranked risk more accurately than the credit bureau score in use, then scored 3,000 new applications.
- Designed an approval rule that cuts estimated loan losses by 68% (KSh 1.27M to KSh 0.41M) while still approving two in three applicants, and presented the trade-offs to management in Power BI.

Wekeza Fintech: Payments, Lending and County Performance — Power BI, SQL, Python

Link: github.com/SharonNyaga/Wekeza_Fintech_PowerBi_Analysis

- Combined 18,000 transactions (KSh 356M), 3,400 loans and 1,600 customers across 30 counties into a six-page Power BI report with county and customer drill-downs.
- Showed that USSD carries half of all transaction value and recommended closer tracking of its reliability and costs, plus judging loan products on late payments, not volume alone.

Sales Performance Dashboard — Power BI, Power Query, DAX

Link: www.datascienceportfol.io/sharonviona/projects/2

- Interactive retail dashboard tracking revenue, customers, products and payment methods, built from cleaned raw sales data.

Experience

Data Analyst (Power BI, SQL, Excel), Self-Employed — Dec 2024 – Present | Remote

- Build Power BI dashboards and SQL/Excel reporting for small-business clients, replacing scattered spreadsheets with reliable reporting tools.
- Find where clients lose time or money and set up tracking so performance can be monitored over time.
- Run projects end to end, from data extraction to dashboard delivery and client walkthroughs.

Data Entry Supervisor, Ministry of Labour and Social Protection — Oct 2024 – Nov 2024 | Kenya

- Led 15+ data-entry staff and held data accuracy at 99% through daily quality checks.
- Cut data-validation time by 20% and lifted team efficiency by 25% through simpler workflows and targeted training.

Freelance Content Writer, Finance and Technology, Fiverr / Direct Clients — 2021 – Present | Remote

- Research and write data-informed content that makes complex finance and technology topics clear for business readers.

Trainee, Kenya Revenue Authority (KRA) — May 2021 – Jul 2021 | Nanyuki

- Supported audit and compliance reviews, verifying records across multiple sources and assisting with audit reporting.

Skills

Business Intelligence	Power BI, DAX, Power Query, data modelling, dashboards, KPI reporting
SQL	MySQL, PostgreSQL, SQLite, joins, CTEs, window functions
Python	pandas, NumPy, Matplotlib, scikit-learn, data cleaning, exploratory analysis
Excel	Pivot tables, XLOOKUP, SUMIFS, dynamic formulas, Power Query
Finance	Credit and lending analysis, financial analysis, audit and compliance
Also	Git, GitHub, VS Code, Google BigQuery, Snowflake (familiar)

Education and Certification

Bachelor of Commerce, Finance, Dedan Kimathi University of Technology — Completed 2021

Microsoft Certified: Power BI Data Analyst Associate (PL-300) — In progress, 2026
